

Step By Step Learning® Instructional Modeling Kit: A Learning Kit for Teachers and Students

Welcome!

Welcome to the world of teaching reading through the Step By Step Learning® Instructional Modeling Kits. These kits are designed to support the modeling and practice steps of learning **how to teach phonological awareness and phonics using explicit and systematic methods**. They are called modeling kits because teachers are introduced to the contents through the modeling of its use by our coaches or through video-taped lessons. Through *modeling*, teachers can observe the skill of teaching systematic lessons and the application of the kit's materials before doing it themselves. Carefully scripted lessons serve as a teaching tool to familiarize teachers with and instruct them on how to teach the most basic yet important early reading skills.

A Sample Lesson

This sampler packet includes a DVD with one lesson from each kit. The lesson from the **Beginning Decoding Kit** demonstrates a small group reading lesson wherein the sound and spelling of the short vowel **e** is taught. Follow along with the printed lesson and then try it with your students. The materials are included in this sampler to help you experience a successful explicit lesson!

The Instructional Modeling Kits

The Step By Step Learning® Instructional Modeling Kits are currently available to teach the following skills:

- Kit One- Phonological Awareness \$795
Basic Phonological and Phoneme Awareness
- Kit Two- Beginning Decoding \$795
Basic Decoding Skills
- Kit Three- Advanced Decoding \$995
Syllable Types, Affixes, and Roots

Each kit includes scripted **20- to 30- minute lessons**, appropriate manipulatives, word lists, and 5 sets of student materials for small group instruction.

The **Instructional Modeling Kit** is not a replacement for core curriculum or supplementary intervention programs. It is meant to support teachers by enhancing their instructional delivery to include the teaching behaviors that have been linked to higher levels of reading ability. These kits teach teachers how to teach and students how to read!

Video Observation Guide

Beginning Decoding Lesson 3 – cvc with e

Teacher Skills	Watch for These Examples	Yes
Explicit Teaching Through Modeling	<i>Shows</i> students <i>how</i> to sound out words orally	
	<i>Explains</i> to students <i>how</i> to decode new words	
	Breaks the decoding skill down into simpler steps, <i>shows</i> , and <i>explains</i> the process to the students	
	<i>Uses short directions</i> to guide student responses	
	<i>Asks</i> students to repeat sounds and words orally	
Comments:		
Monitors Student Responses	Briefly checks students' skills: listens to them, asks them to decode new phonic element - sounds and words	
	Notes student weaknesses, rechecks learning, or reteaches	
Comments:		
Provides Specific Praise & Practice Opportunities	<i>Specifies the student behavior</i> in the praise offered	
	<i>Provides multiple opportunities</i> for students to practice the new skill!	
Comments:		
Uses Corrective Feedback	When students make mistakes, responds with the following steps:	
	1. <i>Models</i> the correct answer or process.	
	2. <i>Leads</i> students to repeat the process correctly <i>with her</i>	
	3. <i>Tests</i> if students could answer by themselves and repeats again	
	4. Checks again for correct response after a brief period	
Comments:		
Scaffolds Learning	<i>Provides support</i> through access to previous learning	
	Does the task <i>with</i> the students and then slowly releases the responsibility for students to do the task independently	
Comments:		
Pacing During Lesson	Uses a <i>brisk and lively pace</i>	
	Prompts for student responses several times	
	Minimal down time between student responses	
Comments:
